

## Podar International School kids visiting Chemistry Labs

Dec. 12, 2017

Students (approx 63) of classes 7<sup>th</sup>, 8<sup>th</sup> and 9<sup>th</sup> from *Podar International School*, Khandwa Road, Indore visited the Discipline of Chemistry on December 12, 2017 for laboratory tour.

Good to see that these small kids were curious to know more out chemistry. Very innocently, they requested to see Sodium Metal - our colleague Dr. Amrendra has shown them Sodium metal- we can see the real happiness on the face of these little kids.

Our PhD and MSc students (Priyanka and Arun) have explained all about our laboratories to these kids. Kids enjoyed the demonstration of fumehood, rotary evaporator and especially by finding application of paper chromatography from their book to column

chromatography in research labs and watching TLC plates under UV chamber.

Mr. Rao (our PhD student) has demonstrated these students the fluorescent behaviour of ZnO nanoparticles.

It was nice to interact with these young minds – hope we were able to inspire some of them to do Chemistry and good Science in future !!!
